EMEC

Chemical dosing and control equipments

EMEC WORLDWIDE

Always near to our customers

EMEC is a family-run company with a global nature, operating worldwide to serve and help our customers in many countries.

We are in all continents with many EMEC branches and many dealers. Our contributors work in our sales and marketing field offices all over the world to provide customers and markets with the best support.

MADE IN ITALY

All our products are manufactured in our factory in Italy.

WARRANTY

All our solenoid pump membrane have 5 years warranty.

CONSTANTLY EVOLVING

Our 35-year industrial footing has bred constant improvements in all our products, expanding range and functions. Our range of products is currently implemented in a broad range of settings:

- Swimming Pools
- Prevention Of Legionellosis
- Oil Industry
- Chemical Industry
- Food Industry
- Beverage Industry
- Aquariums & Zoos
- Hotels & Resorts
- Spas
- Industrial Water Treatment
- Potable Water Treatment
- Hospitals
- Cooling Towers
- Fertigation
- Car Wash
- Livestock farming

DISCOVER EMEC

THIRTY-FIVE YEARS OF LEADERSHIP

EMEC ranks among Italy's top, consolidated industrial actors in the field of electronic control systems for fluids metering and management applications. Our products are designed and manufactured for both industrial and small-scale applications. We are an all-Italian business entity with a clear strategic outlook, right from the outset, striving to merge design innovation with a long-term industrial footing. Our high-precision, hi-reliability products are entirely designed and assembled at our Rieti facilities. EMEC's reputation as a market leader is expanding both in Italy and internationally, boosting demand for our quality, Italian designer products.

QUALITY FIRST

Our products are supported by passion and a solid industrial background. At EMEC, we have always sought to identify and seize investment opportunities, committing our resources to technology and human resources. That key to our success - and what sets us apart from market competitors - is our complete control of the production cycle, reliant on specialist business set-ups and resources. Our approach feeds into all aspect ahead of end product delivery: systems design, component production and assembly, software programming and final testing. In line with total quality commitments, we provide installation and maintenance specialists with up-to-date training for both our household and industrial products. Our retail and commercial units operate with a technical mindset, encompassing a firm grounding in all aspects of design and production; as such, they stimulate product innovation and enhancements based on Customer requirements, feedback and field experience. That approach makes us ideal partners when it comes to delivering targeted solutions to specific requirements. Our claims are anything but overstated: complete control, to us, is the only viable approach to ensuring total product quality and effective service delivery.

SUSTAINABILITY

Respecting and safeguarding the environment are the core values underpinning our business. In keeping with that commitment we engage in and promote all actions designed to curb the environmental impact of our processes, products and raw materials, on a life-cycle basis. Our company implements an Environmental Management System compliant with UNI ENI ISO 14001 standards, subject to ongoing updates. Our goal is to curb atmospheric emissions, rationalise water consumption and enact appropriate waste management policies. Environmental impact assessments cover new products, process innovations and public tenders. We are committed to providing our employees and staff with appropriate information and training concerning our company policy and its implementation with respect to both the workplace and our products.

CERTIFIED SKILLS AND VALUES

EMEC's values and reliability are the result of a long-standing commitment to quality and detail. We testify to that commitment through ongoing human resources training, rigorous abidance by production benchmarks, and concerted efforts to curb all employee health hazards. Our pledge is a firm one and is backed by our policy implementation and investment goals. Our global quality approach matches our market standing and is certified by the world's leading certification institutes.

ALL THE POWER YOU NEED

From the beginning, we decided to meet any dosing needs, even the most extreme. Exactly from this idea originates the series of motor driven pumps PRIUS, entirely designed and developed by EMEC to comply with any need of a higher dosage, with a range of 12 models.

POWER AND ACCURACY

The series of motors available for the PRIUS allows a wide range of flow rates, from a few liters up to over 1000 liters per hour, and a working pressure which can reach up to 100 bar, while maintaining at the same time, thanks to the quality of design and construction gained by EMEC in 34 years of research and development, the steady and absolute accuracy in dosage distinguishing of all our products.

RESISTANCE AND SAFETY

To succeed in combining power and accuracy in every situation of use is also possible thanks to a high degree of resistance and versatility. The possibility to choose between models with PTFE diaphragm and models with ceramic or SS plunger, together with liquid ends available in different materials and sizes to choose, makes motor driven pumps PRIUS able to meet any need of use and to result safe and resistant according to the nature of the substance to dose: from very viscous liquids to particularly aggressive chemical agents, from acidic solutions to basic, up to solvents and polymers.

CONTROL AND MANAGEMENT

Mechanical regulation of desired flow rate of PRIUS pumps is possible thanks to the specific knob. However, for higher management needs, EMEC also created the revolutionary series of multifunction motor driven pumps PRIUS MF. A completely new level of accuracy

in dosing control and regulation is ensured by the encoder electronic control, already used successfully in all our control instruments, the LCD display, permitting an easy and precise reading of all the data, and above all by the possibility to set up PRIUS MF with 7 different working modes. The maximum level of control is also ensured by the integration with our exclusive remote management system ERMES, that allows monitoring of the PRIUS MF pumps from everywhere and in every moment. Furthermore, through the Modbus (RS485) electronic module you can combine MF pumps with other instruments and manage everything through PLC (Programmable Logic Controller).

RELIABILITY AND EFFICIENCY

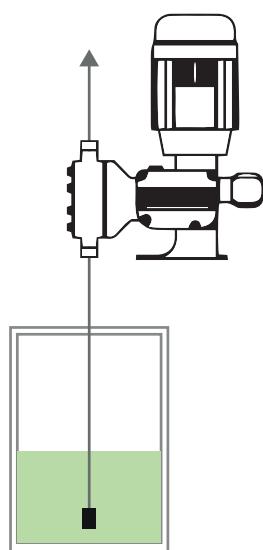

The great resistance and strength of PRIUS motor driven pumps ensure a high degree of efficiency and reliability, constant over time, with minimal servicing needs and a particularly long operating life. Lastly, PRIUS MF can comply with any situation by rotating the pump body by 90° over the electronic unit. The top qualities of power and accuracy in dosing, combined with the great reliability and the great versatility of the available models, make the motor driven pumps of PRIUS series suitable for a wide range of applications: from potable water facilities to treatment of water resulting from industrial activities, in purification systems and in food industry as well as in chemical industry. Wherever a top-level dosing system is required, PRIUS is the best answer.

PRIUS D MF 50/60 Hz 1-PHASE

Multifunction electronic control

MOTOR

0,37 kW: 3-phase 230 V 1370 rpm

PRIUS D MF 50/60 Hz with SINGLE-PHASE supply has: 10 working modes (constant, ppm, %, mlq, pause-work, weekly, pulse, mA, Volt and Batch), level control, alarms, stand-by, double position of the electronic unit (standard or alternative gear box mounting), PTFE diaphragm, aluminium enclosure, spring return mechanism, manual degassing valve (PVDF and PP pump heads), flow regulation, double ball check valve and liquid ends available in different sizes and materials. PVDF, Stainless Steel or PP pump heads available.

Multifunction motor pump PRIUS D MF 50/60 Hz SINGLE-PHASE brings, moreover, a unique level of management thanks to LCD display and encoder electronic controller that ensure the highest accuracy in dosage setting.

OPTIONS: MODBUS, IP65 Motor.

ALTERNATIVE GEAR BOX POSITION

DEFAULT GEAR BOX POSITION

FEATURES

- Multifunction motor driven high pressure pump with inverter
- Working mode: Constant, ppm, %, mlq, pause-work, weekly, mA, Volt and Batch
- Level control
- Alarms
- Stand-by
- Double position of the electronic unit (default or alternative gear box position)
- PTFE diaphragm
- Aluminium enclosure
- Spring return mechanism
- Stroke adjustment
- Double ball check valve

PRIUS D

50 Hz 3-PHASE

MOTORS

0,18 kW: 3-phase 230 V 1350 rpm
0,37 kW: 3-phase 230 V 1370 rpm
0,55 kW: 3-phase 230 V 1395 rpm

PRIUS D 50 Hz with 3-PHASE motor has: PTFE diaphragm, aluminium enclosure, spring return mechanism, manual degassing valve (PVDF and PP pump heads), flow regulation, double ball check valve and liquid ends available in different sizes and materials. PVDF, Stainless Steel or PP pump heads available.

FEATURES

- 3-phase motor
- PTFE diaphragm
- Aluminium enclosure
- Spring return mechanism
- Manual degassing valve (PVDF and PP pump heads)
- Double ball check valve
- Stroke adjustment
- Liquid ends available in different sizes and materials

PRIUS D 60 Hz 3-PHASE

MOTOR

0,37 kW: 3-phase 220/380 V 1670 rpm
0,18 kW: 3-phase 220/380 V 1650 rpm

PRIUS D 60 Hz with 3-PHASE motor has: PTFE diaphragm, aluminium enclosure, spring return mechanism, manual degassing valve (PVDF and PP pump heads), flow regulation, double ball check valve and liquid ends available in different sizes and materials. PVDF, Stainless Steel or PP pump heads available.

FEATURES

- Single-phase motor
- PTFE diaphragm
- Aluminium enclosure
- Spring return mechanism
- Manual degassing valve (PVDF and PP pump heads)
- Double ball check valve
- Stroke adjustment
- Liquid ends available in different sizes and materials

INSTALLATION KITS

PRIUS

ACCESSORIES

A. INSTALLATION KIT

included without extraprize

1/2" foot filter with 13 mm (int. diam.) hose fitting
3/4" injection valve
PVDF delivery hose (13X16 PVDF or 12x18 PVC)
PVDF suction hose (13X16 PVDF or 12x18 PVC)

B. INSTALLATION KIT

1 1/2" foot filter with 18 mm (int. diam.)
hose fitting (G1 1/2" - 18 mm)

C. INSTALLATION KIT

1 1/2" foot filter with 32 mm (int. diam.)
hose fitting (G1 1/2" - 32 mm)
1 1/2" injection valve

- **Delivery hose**
18x22 PVDF

- **Suction hose**
18x25 PE

- **Delivery hose**
32x42 PVC (meshed)

- **Suction hose**
32x40 PVC (spiral hose)

PRESSURE / SECURITY VALVE

The pressure/security valve, directly controlled by the medium, is used in technical processing plants to keep constant working pressures on the primary side. The pressure/security valve can also be used as an overflow valve to prevent pressure peaks. In this case, the pressure/security valve is fitted in a bypass line.

Operating Pressure: 0,5-10 bar
Opening Pressure: 0,3 bar

PULSATION DAMPENERS

SOIM2.5 - SOIM5

PVC pulsation damper without membrane.

FKM B o-ring.

Available in 2,5 liter (SIOM2.5)
